KIT NO. 9014995 Page 1 of 2

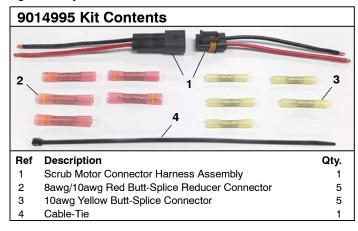

Brush Motor Connector Retrofit Kit

NOBLES

Models: T300, T300e, Speed Scrub 300, A300

This kit includes the necessary parts to replace a damaged brush motor connector. The factory installed red motor connectors when exposed to specific cleaning agents may crack due to a chemical reaction.

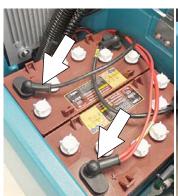

INSTALLATION INSTRUCTIONS:

Installation Time: 1 Hour

Tools Required: 10 mm socket wrench, wire cutters, wire stripper, terminal crimper and heat gun.

FOR SAFETY: Before servicing machine, stop on level surface, turn key off, disconnect batteries and set parking brake if equipped.

 Disconnect battery cables from machine and remove front shroud to access brush motor connectors.

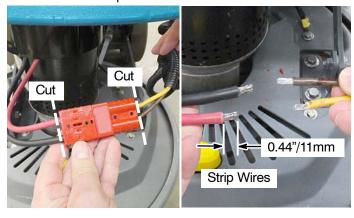

2. Cut cable-tie securing the motor connector harness to machine.

Cut the four wires connected to the red connector as shown and strip wires as described.

- 4. Connect the red and black motor wires to the kit male connector wires as described below. Perform pull test to ensure crimps are secure.
 - **A** Brush Motors with 8 awg wires, use two red butt-splice connectors.
 - Models with Single Disk Motor.
 - **B** Brush Motors with 4mm² or 6mm² wire, use two yellow butt-splice 10 awg connectors.
 - Models with Dual Disk, Cylindrical or Orbital Motor.

6. Carefully apply heat to all four butt-splice insulators to seal wire connections.

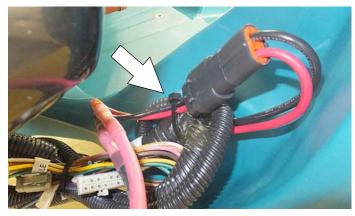

Connect kit connectors together. Make sure lock tab is engaged.

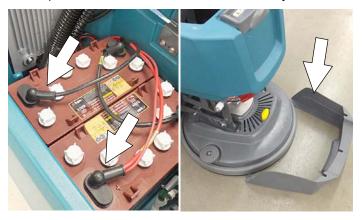

8. Insert the new cable-tie into the cable-tie tree clip where original connector was secured.

Secure the kit brush motor connector and machine harness with cable-tie as shown.

10. Replace front shroud and reconnect battery cables.

11. Test machine to ensure brush motor is operating.
