Tennant Technologies

Tennant's technologies help you to enhance safety and productivity while reducing water and chemical usage.

IRIS® Fleet Manager

IRIS® Fleet Manager allows you to manage your fleet of machines across multiple sites. This intelligent command center delivers key performance metrics, empowering you with actionable insights to optimise fleet performance, improve cleaning efficiency, drive measurable results, and reduce cost-to-clean.

ec-H2O NanoClean™

Like the original ec-H2O™, ec-H2O NanoClean™ technology electrically converts water into an innovative cleaning solution that cleans effectively, saves money, and reduces environmental impact compared to daily floor cleaning chemicals*.

ec-H2O™

ec-H2O™ scrubbing technology improves productivity by scrubbing up to 3 times longer with a single tank. It uses less chemicals and packaging and up to 70% less water than conventional methods, thus reducing the environmental impact of your daily cleaning and maintenance activities. It also improves safety for both passers-by and operators.

More than clean, it's ReadySpace®

ReadySpace®

ReadySpace® rapid-drying carpet cleaning technology provides clean, fresh carpets in minutes to reduce room and carpet area closure times. It uses up to 80% less water to clean and leaves 90% less water in the carpet.

*ec-H2O NanoClean™ technology is not suitable for all soils, including heavy concentrations of fats and oils. Depending on the type of soil, conventional chemical cleaners may be required.
